

Why is spending still reactive?

“Users can see where their money went — but not where their spending is heading.”

Questions users have

Is my spending higher than usual?

Am I likely to overspend next week?

How much should I safely spend?

Transaction history ≠ financial guidance.
Past data doesn't tell you what to do next.

The problem isn't lack of data.
It's lack of actionable context.

THE SOLUTION

From reactive to proactive.

- 1

Create Saving Pots

Organize your goals. Create pots for what matters to you.
- 2

Add Money to Your Pots

Save consistently and watch your pots grow.
- 3

We Predict. You Plan Ahead.

Our ML analyzes your spending and predicts your next week.
- 4

Get a Recommended Limit

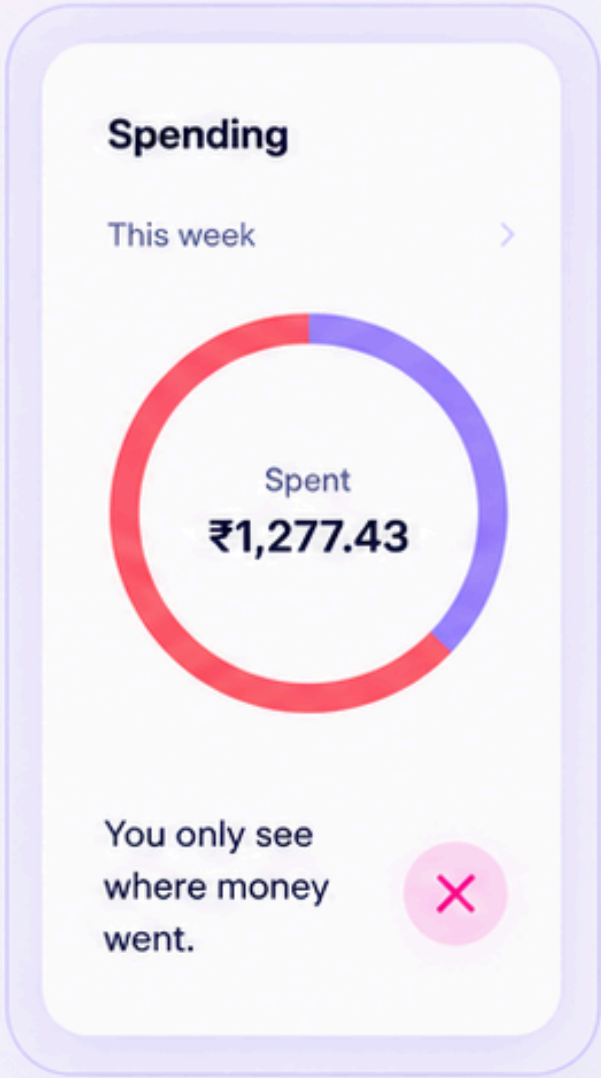

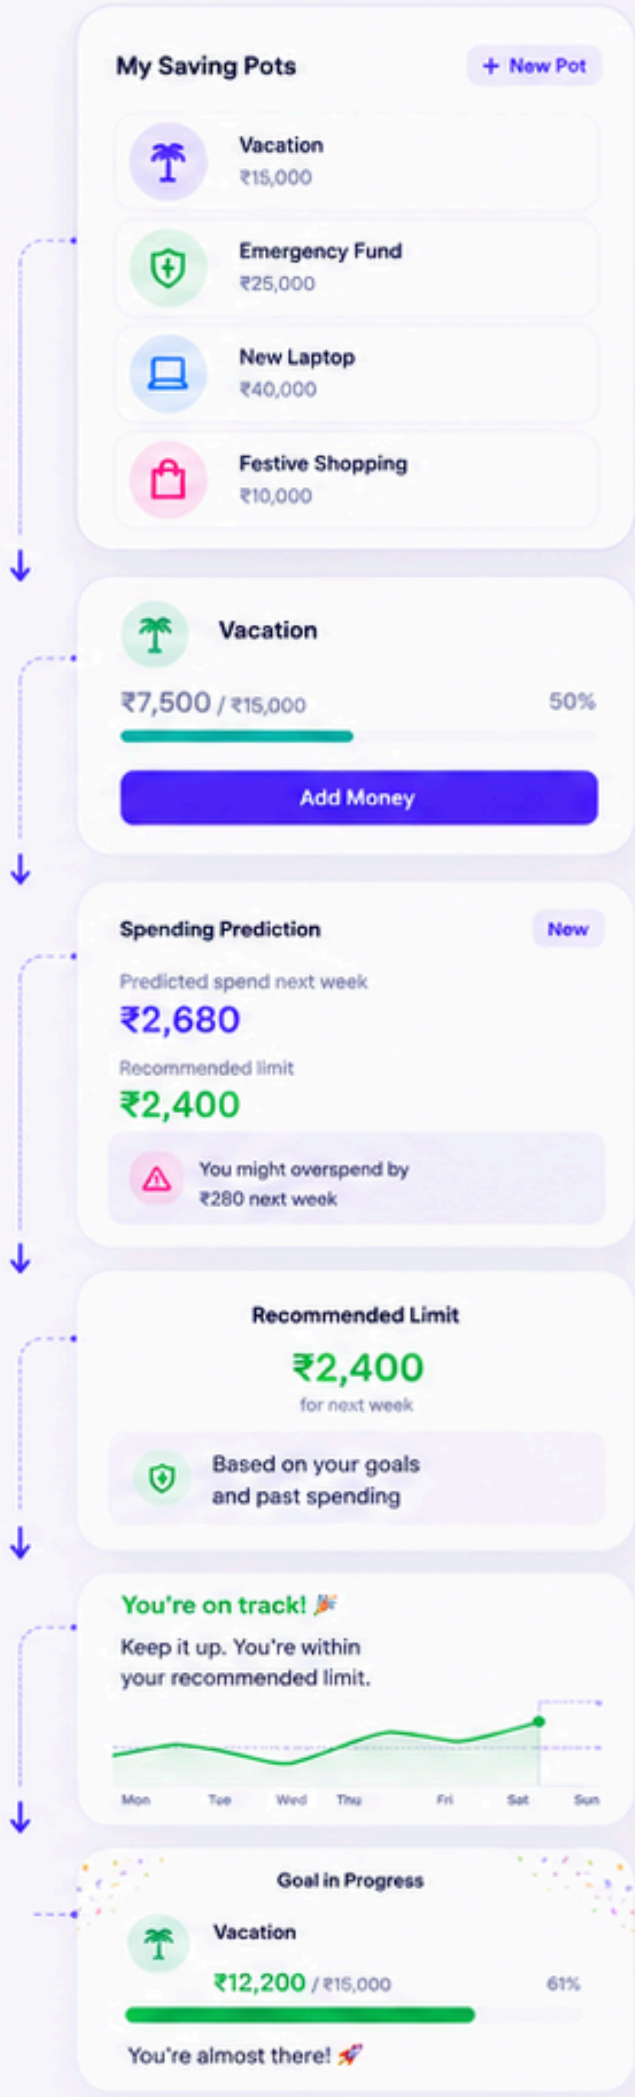

We suggest a smart spending limit just for you.
- 5

Take Action Early

Stay in control, adjust your plan, and avoid overspending.
- 6

Achieve Your Goals Faster

Consistent saving + smart planning = financial freedom.

PRODUCT ARCHITECTURE SPENDING BEHAVIOUR ENGINE

From transaction history to personalised financial intelligence.

An expense only becomes meaningful when compared with the user's **own behaviour**.

01 WEEKLY LENS

Is my overall spending unusual?
